

# An Affordable Image Management Solution from CoActiv Medical for Orthopedics

*Spine Labeling*

CoActiv offers a variety of scalable orthopedic solutions based on our field proven enterprise-class EXAM-PACS® suitable for the small practice, the large multi-site organization and everything in between.

Delivering leading edge, full-featured digital workflow at affordable prices, CoActiv's EXAM-PACS for orthopedic practices is a web-based PACS system fine-tuned to meet the unique needs of general orthopedic practices and offering advanced functionalities for a full range of orthopedic sub-specialists. The application provides all important orthopedic imaging tools, including **Spine Labeling** and **Cobb's Angle** measurement for Scoliosis surveys. It also offers instant bi-directional integration with **OrthoView**, the world's most complete pre-surgical orthopedic templating application that supports most major implant manufacturers and conveniently saves surgical plans within patient image files.

*OrthoView Templating*

*Post-Op Annotations*

Designed to grow with a practice as it expands, CoActiv solutions are scalable and highly configurable. EXAM-PACS is fast and easy to install--usually within 30 days of receipt of order--as well as fast and easy to learn, with installation and training normally accomplished in one day. Our system is affordable, often costing less than a few years of replaced film costs to acquire. We offer instant local and remote access to all your exams, professional 7x24x365 support by live, qualified PACS engineers, and we accept all DICOM modalities at no additional charge.

All versions of EXAM-PACS support EXAM-CLOUD® automatic, secure HIPAA-compliant QUAD-REDUNDANT ARCHIVING®. All CoActiv PACS Versions are FDA Listed, 100% HIPAA Compliant and IT-Smart!
